

INTRO

Ratmen are small humanoids, closely related to rats. Individually weak, they rely on large numbers of warriors, growth-serum injected beasts, and inventive war-machines.

The Ratmen first emerged from the sewer systems beneath the Old Empire's greatest cities, but were viewed as abominations by the humans and quickly driven out. Faced with many dangers and few friends, the Ratmen have become fanatical warriors and cunning tacticians, often serving as a buffer to the society that drove them out.

ABOUT OPR

OPR (www.onepagerules.com) is the home of many free games which are designed to be fast to learn and easy to play.

This project was made by gamers for gamers and it can only exist thanks to the support of our awesome community.

If you want to help us in making more awesome content, you can support us on www.patreon.com/onepagerules

Thank you for playing!

BACKGROUND STORY

The Ratmen only started appearing long after humanity and their cities had become widespread throughout much of Tyria. Little is known about how or why they came into being, but they emerged from sewer systems beneath human cities. When their existence was discovered by the humans above, they were viewed as abominations and driven out of the cities. The surviving Ratmen sought refuge in neighbouring lands, but none were willing to accept them.

The Ratmen eventually found a new home in a stretch of land that had been particularly devastated during the Havoc Wars. In the Northlands, surviving Havoc Warriors continued to raid and plunder, while the original Human inhabitants had mostly moved to the more defended southern regions. The Ratmen settled in these largely abandoned lands, and their numbers rapidly grew as they reclaimed the territory which had been left barren by years of brutal warfare. They rapidly built fortified cities, designed to withstand attack from raiders and any others who might try to claim the Ratmen's land as their own.

For a time, the Ratmen prospered thanks to their diligent work and the region's rich natural resources, and soon their society grew prosperous. Within their massive cities, they organised themselves into many guilds, each specialised in providing different benefits for their society, and their cities were ruled by commissions made up of the heads of the city's key guilds. Yet, as Tyria continued to recover from the Havoc Wars, the Ratmen's lands fell under increasing pressure from their various neighbours, who sought to reclaim it and forced the Ratmen to endure constant sieges and warfare in order to defend their home.

The opening of the Rift was the fatal blow to their former society. The rift tore through several cities, destroying their walls, while the forces of Havoc rallied in the north. Panic spread and soon, and the various Guilds were fighting among themselves.

Just as the forces of Havoc approached their lands, and all hope was lost, a miracle happened. A godly figure of a female rat appeared in the sky and struck down their enemies' army. The remaining Rats renounced their quarrels and reunited to fight in the name of their mysterious new Goddess, creating a cult in her name that now occupies every corner of their society. Her disciples whisper in the ears of the guild masters, and while many see her as a saviour, others view her as a threat to their still delicate positions.

How will you serve the Guilds and God-Mother?

AOFS - RATMEN V3.5.3

Name [Size]	Qua	Def	Equipment	Special Rules	Cost
Battle Master [1]	4+	4+	1x Heavy Hand Weapon (A3, AP(1))	Fearless, Hero, Scurry, Tough(3)	50pts

Storm Ogre [1]	3+	3+	1x Flame-Fists (12", A1, Blast(3), Reliable) 1x Bash (A2)	Fearless, Furious, Scurry, Tough(3)	70pts

ARMY-WIDE SPECIAL RULE

Scurry: Moves +2" when using Advance, and +2" when using Rush/Charge.

SPECIAL RULES

Counter-Attack: Strikes first when charged.

Defense Debuff: Once per activation, before attacking, pick up to 4 enemy units within 18" in line of sight, which gets -1 to defense rolls once (next time the effect would apply).

Evasive: Enemies get -1 to hit rolls when attacking units where all models have this rule.

Hazardous: Gets AP(4), but this model's unit takes one wound on unmodified rolls of 1 to hit.

Melee Slayer: When this model charges, its weapons get AP(+2) if most models in the target have Tough(3) or higher.

Quick Readjustment: This model ignores penalties from shooting after moving when using Indirect weapons.

Reinforcement: When a unit where all models have this rule is Shaken or fully destroyed, you may remove it from the table as destroyed and place a new copy of it fully within 12" of any table edge at the beginning of the next round after Ambushers have been deployed. Units that deploy via Reinforcement can't seize or contest objectives on the round they deploy, and this rule doesn't apply to the new copy of the unit.

Repel Ambushers: Enemy units using Ambush must be set up over 12" away from this model's unit.

Scurry Boost: If this model has Scurry, it moves +4" on Advance and +4" on Rush/Charge from Scurry (instead of only +2" and +2").

Shielded: Units where all models have this rule get +1 to defense rolls against hits that are not from spells.

Takedown Strike: Once per game, when it's this model's turn to attack in melee, it may make one attack at Quality 2+ with AP(2), Deadly(3), and Takedown.

Unpredictable Fighter: When in melee, roll one die and apply one effect to all models with this rule: on a 1-3 they get AP(+1), and on a 4-6 they get +1 to hit rolls instead.

Vanguard: After this model is deployed, it may be placed anywhere fully within 9" of its position.

AURA SPECIAL RULES

Ambush Aura: This model and up to 3 friendly units picked before the start of the game get Ambush. If this model is killed, picked models that are deployed lose the rule.

Bane in Melee Aura: This model and up to 3 friendly units picked before the start of the game get Bane in melee. If this model is killed, picked models that are deployed lose the rule.

Bane when Shooting Aura: This model and up to 3 friendly units picked before the start of the game get Bane when shooting. If this model is killed, picked models that are deployed lose the rule.

Counter-Attack Aura: This model and up to 3 friendly units picked before the start of the game get Counter-Attack. If this model is killed, picked models that are deployed lose the rule.

Evasive Aura: This model and up to 3 friendly units picked before the start of the game get Evasive. If this model is killed, picked models that are deployed lose the rule.

Increased Shooting Range Aura: This model and up to 3 friendly units picked before the start of the game get +6" range when shooting. If this model is killed, picked models that are deployed lose the rule.

Precision Fighter Aura: This model and up to 3 friendly units picked before the start of the game get +1 to hit rolls in melee. If this model is killed, picked models that are deployed lose the rule.

Scurry Boost Aura: This model and up to 3 friendly units picked before the start of the game get Scurry Boost. If this model is killed, picked models that are deployed lose the rule.

Stealth Aura: This model and up to 3 friendly units picked before the start of the game get Stealth. If this model is killed, picked models that are deployed lose the rule.

ARMY SPELLS

Magic Skitter-Step (1): Pick up to two friendly units within 12", which get Scurry Boost once (next time the effect would apply).

Heavenly Strike (1): Pick up to two enemy units within 12", which take 1 hit with AP(2) each.

God-Mother's Frenzy (2): Pick up to four friendly units within 12", which get Melee Slayer once (next time the effect would apply).

Choking Censer-Fog (2): Pick up to two enemy units within 12", which take 3 hits each.

Cracking Bell-Chime (3): Pick up to six enemy units within 18", which get -1 to defense rolls once (next time the effect would apply).

Lightning Blast (3): Pick up to three enemy models within 12", which take 2 hits with Hazardous each. Roll as many dice as hits to see if "on rolls of 1" effects trigger. This effect is resolved as if the target was a unit of [1].
