

INTRO

High Elves are a faction of prosperous Elven principalities made up of traders and merchant-princes. Their wealth allows them to maintain elite and highly mobile armies, emphasising cavalry and archery over more durable line infantry.

The High Elves have built a prosperous realm along the coast of Tyria, though they remain a shadow of their former glory. The High Elves once sought to build an empire to rival humanity and unite the Elves under their rule. Instead, their ambitions have twice resulted in costly and violent civil war, which has left the Elven peoples fragmented.

ABOUT OPR

OPR (www.onepagerules.com) is the home of many free games which are designed to be fast to learn and easy to play.

This project was made by gamers for gamers and it can only exist thanks to the support of our awesome community.

Thank you for playing!

BACKGROUND STORY

The Elves of Tyria once lived together in the Heartwoods, which took up much of western Tyria. These Elves often came into conflict with Humans encroaching on their borders. Over time, some Elves began to learn from their foes, taking metal weapons and tools from them, and they even began trading with them. These Elves started to adapt human tools and knowledge to their home. They called themselves High Elves, as they began to build stone towers and claim parts of the forest lands for their Kingdoms, driving out those who refused to adopt their ways. The remaining Elves allied with the spirits of the forest and fought back, defeating the High Elves and forcing them into exile.

The High Elves migrated to the coast of Tyria, on the edge of the Heartwood forest. They settled this isolated and sparsely populated land, and rapidly built new cities of stone and steel along the coast, while using whatever lumber they could find to build great fleets. These cities competed for power and position amongst themselves, and High Elven rulers considered wealth, intrigue, and knowledge to be every bit as critical to their cities' welfare as castle walls and a standing army.

The High Elves sought out knowledge and skills, like smithing and craftsmanship from their neighbours, while jealously guarding their own secrets. Enterprising High Elves became wealthy and powerful, while the rest risked falling into poverty. They built trade colonies throughout Tyria, but their richest colonies were in the Dark Isles, where the High Elves grew spices and mined gold.

When the Havoc Gods arrived in Tyria, the High Elves reluctantly set aside their old rivalry with the Wood Elves to make a temporary alliance, offering their aid in exchange for wood and other supplies to build their fleets and feed their armies. This alliance soon expanded to include much of Tyria, with Dwarves, Humans and Goblins. However, the Elves of the Dark Isles took the chance to declare their independence. When their conflict with the Havoc Gods ended, the remaining High Elven armies and fleets sought to reclaim their lost colonies, but were soundly defeated by the Dark Elves and their allies.

Now the High Elves have lost their fleet and colonies, whilst Havoc followers raid their shores, and the Wood Elves refuse to aid them. Still, the High Elves seek out new opportunities, exploring through Voidgates and forging new alliances.

How will you return your people to prosperity?

AOPS - HIGH ELVES V3.5.3

Name [Size]	Qua	Def	Equipment	Special Rules	Cost
High Noble [1]	3+	4+	1x Heavy Hand Weapon (A3, AP(1))	Hero, Highborn, Tough(3)	55pts

Giant Eagle [1]	4+	4+	1x Claws (A2)	Fast, Flying, Highborn, Impact(2), Tough(3)	60pts

ARMY-WIDE SPECIAL RULE

Highborn: Moves +2" when using Advance, and +2" when using Rush/Charge.

SPECIAL RULES

Bounding: When this unit is activated, you may place all models with this rule in it anywhere fully within D3+1" of their position.

Crack: On unmodified results of 6 to hit, those hits get AP(+2).

Highborn Boost: If this model has Highborn, it moves +4" on Advance and +4" on Rush/Charge from Highborn (instead of only +2" and +2").

Piercing Tag: Once per game, during this model's activation, pick one enemy unit within 24" and in line of sight of it, and place X markers on it. When attacking, friendly units may remove markers from their target before rolling to block to get +AP(Y) on their weapons, where Y is the number of removed markers.

Precision Debuff: Once per activation, before attacking, pick up to 4 enemy units within 18" in line of sight, which gets -1 to hit rolls when attacking once (next time the effect would apply).

Quick Shot: This model may shoot after using Rush actions.

Resistance: When a unit where all models have this rule takes wounds, roll one die for each. On a 6+ it is ignored. If the wounds were from a spell, then they are ignored on a 2+ instead.

Shielded: Units where all models have this rule get +1 to defense rolls against hits that are not from spells.

Shred: On unmodified results of 1 to block hits, this weapon deals 1 extra wound.

Spell Conduit: Casters within 12" that are from other friendly units may cast spells as if they were in this model's position, and get +1 to casting rolls when doing so. Friendly casters may only use this rule if this unit isn't Shaken.

Strafing: Once per activation, when this model moves through enemy units, pick one of them and attack it with this weapon as if it was shooting. This weapon may only be used in this way.

Vanguard: After this model is deployed, it may be placed anywhere fully within 9" of its position.

AURA SPECIAL RULES

Fearless Aura: This model and up to 3 friendly units picked before the start of the game get Fearless. If this model is killed, picked models that are deployed lose the rule.

Highborn Boost Aura: This model and up to 3 friendly units picked before the start of the game get Highborn Boost. If this model is killed, picked models that are deployed lose the rule.

Relentless Aura: This model and up to 3 friendly units picked before the start of the game get Relentless. If this model is killed, picked models that are deployed lose the rule.

Shielded Aura: This model and up to 3 friendly units picked before the start of the game get Shielded. If this model is killed, picked models that are deployed lose the rule.

Shred in Melee Aura: This model and up to 3 friendly units picked before the start of the game get Shred in melee. If this model is killed, picked models that are deployed lose the rule.

ARMY SPELLS

Eagle-Eyed Focus (1): Pick up to two enemy units within 18", which friendly units get +1 to hit rolls when shooting against once (next time the effect would apply).

Arcane Blast (1): Pick one enemy unit within 18", which takes 1 hit with Blast(3).

Magical Surge (2): Pick up to four friendly units within 12", which get Bane in melee once (next time the effect would apply).

High Tempest (2): Pick up to four enemy units within 9", which take 2 hits each.

Path to Glory (3): Pick up to six friendly units within 12", which get Highborn Boost once (next time the effect would apply).

Magic Arrows (3): Pick up to three enemy units within 12", which take 2 hits with AP(1) and Crack each. Roll as many dice as hits to see if "on rolls of 6" effects trigger.
