

INTRO

The Havoc Warriors are fanatical followers of the Havoc Gods, and their numbers consist of everything from skilled warriors adorned in heavy armour to berserkers with only their faith and fury to protect them, supported by hordes of mutants and daemons.

Their strange and varied warbands strike fear into the hearts of their foes. Many different peoples have been driven to embrace the worship of Havoc, often seeking salvation from death, whether by enemies, disease, or any number of other causes. Scattered and driven into hiding after their Gods were sealed, the Havoc Warriors have returned in the wake of the Great Rift.

ABOUT OPR

OPR (www.onepagerules.com) is the home of many free games which are designed to be fast to learn and easy to play.

This project was made by gamers for gamers and it can only exist thanks to the support of our awesome community.

Thank you for playing!

BACKGROUND STORY

Human tribes were slow to settle the Northlands. Their numbers were always few, and they relied more on hunting than farming. Gradually, the Human Empire began to expand northward, even into the previously remote tribal lands. Some northern tribes were conquered, but many others joined willingly as allies, seeking to benefit from peace, trade, and infrastructure.

The Northlands were seen as a frontier territory by the Human Empire. Some roads were built, and a few soldiers were sent north, but in the end, little changed for Northerners as the soldiers were too few to prevent raids from neighbours, and few traders bothered to come north along the roads. Instead, outcasts and criminals would often flee north in order to hide from the law, making the Northlands more dangerous than they had ever been.

The arrival of the Havoc Gods in Tyria caused a great deal of instability, as many began to worship these new Gods. The Empire recalled many of their troops to defend their Capital and nearby regions, hoping to put down any rebellions there, abandoning the northern tribes, and leaving them to deal with the Daemons on their own.

By the time that the Havoc Wars had begun in full, most of the northern tribes had either united under Havoc or were wiped out by those who did. Some just hoped to be spared, others sought revenge against the Empire and some hoped that Havoc might offer them better lives. The warriors of these tribes crushed the northern Dwarves before turning south. The followers of Havoc, or Havoc Warriors, drove deep into the Empire, pillaging as they went.

When the Havoc Gods were sealed away, the Daemons and their mortal followers were soon routed, and the surviving Havoc Warriors fled north. Still weakened by war, the Empire and its allies were not able to fully reoccupy the Northlands. Instead, they built a series of forts along its border in order to defend their lands. Though scattered and weakened, the Havoc Warriors remained, fighting amongst themselves for what little food and wealth they could scavenge, as well as anyone foolish enough to venture into their land without military protection.

The opening of the Great Rift was greeted with celebration in the Northlands as the Havoc Warriors regained their magic and their gods. Now, the tribes are looking south with new energy, plundering their weakened neighbours, and waiting for the chance to strike into the heart of Tyria once more.

How will you bring glory to your god?

AOPS - HAVOC WARRIORS V3.5.3

Name [Size]	Qua	Def	Equipment	Special Rules	Cost
Chosen Havoc Master [1]	3+	3+	1x Heavy Hand Weapon (A3, AP(1))	Havocbound, Hero, Tough(3), Versatile Attack	60pts

ARMY-WIDE SPECIAL RULE

Havocbound: When this model shoots at enemies over 9" away, or when it charges, its weapons get AP(+1).

SPECIAL RULES

Fortified: When units where all models have this rule take hits, those hits count as having AP(-1), to a min. of AP(0).

Havocbound Boost: If this model has Havocbound, it always gets AP(+1) from Havocbound (instead of only when shooting over 9" away, or when charging).

Ranged Shrouding: Enemies get -6" range when trying to shoot units where all models have this rule.

Shred: On unmodified results of 1 to block hits, this weapon deals 1 extra wound.

Steadfast: If a unit where all models have this rule is Shaken at the beginning of the round, roll one die. On a 4+, it stops being Shaken.

Unpredictable: When attacking, roll one die and apply one effect to all models with this rule: on a 1-3 they get AP(+1), and on a 4-6 they get +1 to hit rolls instead.

Unpredictable Fighter: When in melee, roll one die and apply one effect to all models with this rule: on a 1-3 they get AP(+1), and on a 4-6 they get +1 to hit rolls instead.

Vanguard: After this model is deployed, it may be placed anywhere fully within 9" of its position.

Versatile Attack: When this unit is activated, pick one effect: until the end of the activation, when shooting or charging enemies over 9" away, all models with this rule in this unit either get AP(+1) or get +1 to hit rolls.

Versatile Defense: When a unit where all models have this rule is deployed or activated, pick one effect: when shot or charged from over 9" away, the unit either gets +1 to defense rolls, or enemy units get -1 to hit rolls against it. This effect lasts until the units' next activation.

AURA SPECIAL RULES

Havocbound Boost Aura: This model and up to 3 friendly units picked before the start of the game get Havocbound Boost. If this model is killed, picked models that are deployed lose the rule.

Ranged Shrouding Aura: This model and up to 3 friendly units picked before the start of the game get Ranged Shrouding. If this model is killed, picked models that are deployed lose the rule.

Scout Aura: This model and up to 3 friendly units picked before the start of the game get Scout. If this model is killed, picked models that are deployed lose the rule.

Shred when Shooting Aura: This model and up to 3 friendly units picked before the start of the game get Shred when shooting. If this model is killed, picked models that are deployed lose the rule.

Steadfast Aura: This model and up to 3 friendly units picked before the start of the game get Steadfast. If this model is killed, picked models that are deployed lose the rule.

Unpredictable Fighter Aura: This model and up to 3 friendly units picked before the start of the game get Unpredictable Fighter. If this model is killed, picked models that are deployed lose the rule.

Versatile Defense Aura: This model and up to 3 friendly units picked before the start of the game get Versatile Defense. If this model is killed, picked models that are deployed lose the rule.

ARMY SPELLS

Cursed Stride (1): Pick up to two enemy units within 18", which counts as being in Dangerous Terrain once (next time the effect would apply).

Barbed Chains (1): Pick one enemy unit within 18", which takes 2 hits.

Havoc Boost (2): Pick up to four friendly units within 12", which get Havocbound Boost once (next time the effect would apply).

Impaling Spike (2): Pick up to two enemy models within 18", which take 2 hits with AP(1) each. This effect is resolved as if the target was a unit of [1].

Dark Shielding (3): Pick up to six friendly units within 12", which get Fortified once (next time the effect would apply).

Thorn Field (3): Pick up to three enemy units within 12", which take 2 hits with AP(1) and Shred each.
